CURRICULUM VITAE · JUNE 2026

Frontend team lead in Istanbul, shipping AI-native dev-tools for the Anthropic Claude API.

I lead the frontend team at **HangiKredi**, Turkey's largest financial product comparison platform serving millions of users monthly. On the side I design and ship a five-tool open-source suite that makes the Claude API legible — protocol-level observability, agent debugging and prompt economics. Five tools, fourteen long-form write-ups across two languages, all browser-only and BYOK.

FEATURED WORK · OPEN SOURCE

Claude Dev-Tool Suite

5 tools · 14 articles · MIT

Five browser-only dev-tools sharing a hand-rolled ~150-line SSE client. Each makes *exactly one thing* visible — token caching, agent loops, prompt economics, tool-use design, pre-flight cost. All BYOK, no backend, deployed individually on Vercel.

context-lens

Pre-flight prompt tokens, cost & window

claudoscope

Live API x-ray: cache, tokens, cost

prompt-lab

A/B test prompts & models, side by side

tool-lab

Interactive Claude tool-use sandbox

agent-replay

Replay an agent trace on a timeline

EXPERIENCE

2026 – Present

Remote · OSS

Creator · Claude Dev-Tool Suite

Open Source (MIT)

Five tools, ~150-line shared SSE client, no backend. Five long-form posts in English on Medium + ferhatatagun.com plus full Turkish translations. Each tool has its own deploy, README, OG card, cross-suite navigation, and matching long-form artifact.

Dec 2023 – Present

Istanbul · Hybrid

Frontend Team Lead

HangiKredi · hangikredi.com

Lead the frontend team for Turkey's largest financial product comparison platform (credit, insurance, banking). Own architecture across React + Next.js + TypeScript codebases.

Drive AI-augmented workflows (Cursor, Claude Code), design system consistency, performance budgets, and the code-review culture.

Dec 2022 – Dec 2023

Istanbul · Hybrid

Frontend Developer

HangiKredi

Built customer-facing frontend features across the React/Next.js stack on credit, insurance, and banking comparison flows. Promoted to team lead after twelve months.

Apr 2022 – Nov 2022

Istanbul

Frontend Developer

Netmera

Built features on an omnichannel customer engagement platform — mobile & web push notifications, in-app messaging, pop-ups, analytics, and marketing automation driven by AI.

Nov 2021 – May 2022

Istanbul

Frontend Team Lead

RND

Led a small frontend team across React projects for international e-commerce brands.

Jan 2019 – Oct 2021

Istanbul

Frontend Developer

RND

Shipped frontend for global brands: **Adidas (IL)**, **Reebok (IL)**, **Vans**, **TNF**, **Hummel (TR)**. Stack: ASP.NET Core MVC backends, Vanilla JS, jQuery, Next.js 12+, React.

SELECTED ARTICLES

- 1 Browser-only Claude streaming
- 2 Prompt caching observability
- 3 Stop choosing prompts by vibes
- 4 Build the sandbox first
- 5 Debugging agents via replay
- 6 Four tools in two weekends
- 7 See the prompt before ship

Each post has a matching Turkish translation. All live on ferhatatagun.com/blog, + Medium.

WRITING · TECHNICAL LONG-FORM

- Building a streaming Claude client in the browser — without the SDK
- Prompt caching is the cheapest Claude optimization. Nobody measures it.
- Your prompt isn't better. You just remember it being better.
- Build the sandbox before you write a single tool
- How I debug Claude agents by replaying their trace
- What I learned shipping four open-source Claude dev-tools in two weekends
- See the prompt before you ship it
